We Test Our Seeds

We have probably the BEST and MOST COMPLETE system of SEED TESTING and TRIAL GROUNDS to be found anywhere. We pay particular attention to seeds suitable for planting in the CENTRAL WESTERN and SOUTHERN STATES. The Seeds offered by us will not only grow but will give satisfaction. They are strong in vitality and are procured from properly selected, cultivated and rogued fields and are as good as grow. ARCHIAS' "SURE SEEDS" have been planted for nearly THIRTY YEARS—ARCHIAS' "SURE SEEDS" are known to almost everybody who plant seeds—ARCHIAS' TRADE MARK is on every package and is a guarantee of QUALITY.

SEED WARRANTY

Most of the failures with seeds are entirely beyond our control and they render it impossible for us to guarantee success, and therefore we want it plainly understood that while we exercise great care to have all seeds, plants and bulbs, sure and reliable, and also true to name, we do not give any warranty, express or implied, as to description, quality productiveness or any other matter, of any seeds, bulbs or plants which we send out, and we will not be in any way responsible for the crop. No officer, agent or employee of this company is authorized to make any warranty whatsoever. If the purchaser does not accept the seeds, bulbs or plants on these conditions notify us at once and we will give instructions for disposition of same, and the money that has been paid for same same to us will be promptly refunded. It is to our interest, however, to have everything of the highest quality obtainable, and we would not furnish seeds of doubtful quality for several times the price that we receive for them, as it would injure us more than it would the purchaser. However, we have so much confidence in our seeds that we hereby agree to refill any order for vegetable or flower seeds free of charge should they prove otherwise than as we represent them. We know of no responsible seed firm which guarantees seeds any further than this. Compare with other catalogues and you will find that we are right.

MISSOURI STATE FAIR

This is not the oldest but is undoubtedly the BEST STATE FAIR in the UNION. Our customers should visit the Missouri State Fair which is held at Sedalia the first week in October of each year in elegant new fire-proof buildings. Big premiums are offered in every department and competition is open to the world. We want every planter of Archias' "Sure Seeds" to grow something for this Fair—and come yourself—make your headquarters at Archias' Seed Store and at our Greenhouses where YOU will always be WELCOME. ONION SEED THAT CAN BE DEPENDENT ON

Grown From the Finest Selected Onions

CULTURE Onion Seed should be sown as soon as possible in the spring, even if the weather is cold, just so the soil works up well. This gives the onion a good start and ahead of weeds and before dry weather sets in. After thoroughly pulverizing the soil, sow 4 to 5 lbs. to the acre, in drills 1 foot apart and about 1/4 inch deep. When 4 inches high, thin out to stand 3 to 4 inches apart in the rows, keeping them well hoed and free from weeds. Onions delight in rich, deep, sandy loam and succeed well if grown for a succession of years on the same ground. Deep plowing prevents blight.

Archias' Select Northern Grown Garden Peas

Our Peas are Northern grown. They are the earliest, hardiest and most productive. For years we have made a specialty of Peas. Much skill is required to properly grow Seed Peas, and we employ experts to handle our crops. Our stocks are bright, handsome, sound as a dollar and of perfect growth.

Sow Peas in drills about 4 inches deep. The drills must not be nearer than 2 feet, except for the lowest sorts. Those growing 3 feet high or more should not be nearer than 3 or 4 feet, and should have brush for their support. Avoid fresh manure and very rich soil, as they cause the vines to grow too rank. One pint will sow 40 feet of drill; 2 bushels for an acre, in drills 3 feet apart.

Archias' Mammoth Tree Tomato

GREATEST WONDER OF THE AGE.

Thousands of our friends have planted Archias' Mammoth Tree Tomato for over fifteen years, and it is more popular today than any other variety, especially to the family gardener.

Fruit is of mammoth size, flesh very thick, excellent flavor; ripens well up to the stem; color dark red, tough skin. Bears well throughout entire summer, holding its large size during severe drouth, while other varieties are dried up. It continues to bear its fruit with the greatest vigor until killed by the frost. Shape round and smooth. The yield of this Tomato is simply enormous, one bushel having been picked off a single plant in one picking. Well cultivated plants have attained the height of 10 feet, and 9 feet across. This should not be classed with other so-called Tree Tomatoes of some houses, as it is the only genuine Tomato of the kind now in existence. Price, 10c per pkt., 3 pkts., 25c; oz., 40c; ¼ lb., \$1.25; 1 lb \$4.50, by mail, postpaid.

How to Make a Hot Bed

Select a well drained spot and make the pile of manure 15 to 18 inches deep; or a foot of soil may

be dug out and filled in with manure, well tramped down. Place the frame on it. Then put 4 inches of good soil all over the surface. Throw some manure or soil up against the outer boards to hold the heat. Put on the sash and keep tight for three or four days. Keep a thermometer in the bed and when the temperature falls to 75 degrees, seed may be sown with safety. The temperature in a hot bed should not be allowed to go above 70 degrees in the day nor below 50 at night. With a hotbed the amateur can start almost any kind of vegetable or flower seed. By sowing such vegetables as Egg Plant, Pepper, Tomatoes, etc., and such flowers as Heliotrope, Scarlet Sage, Vinca, Verbena, etc., along in March, it is possible to have nice stocky plants ready to set out as soon as the weather conditions are favorable, insuring early returns from the vegetables and a long season from the flowers.

To Produce a Good Lawn—Plow or dig up the surface thoroughly to a depth of 12 inches and mix the soil with well rotted manure or our Hamlet Brand Lawn Fertilizer, the latter being at all times preferable, as it is more durable in its effects and free from weed seeds, which are always contained in more or less quantities in stable manure.

The soil should be well pulverized before sowing, and the lawn kept free from weeds the first season. The quantity of seed required is one pound to every 300 square feet.

SOME ALFALFA PROFITS THERE

S. E. Martin, owner of the Crole farm, near Knob Noster, was in the city yesterday, arranging for a sale of three farms by auction, on November 2. This sort of an auction will be new to Pettis county, and will be watched with interest by real estate men. Mr. Martin has a "patch" of alfalfa this year that is doing remarkably well, and if next year is a good year he hopes to break a record made this year by his brother-in-law in Saline county, Kas., who sold the seed from a second crop of alfalfa off of 26 acres for \$1,342.90, net.

It will pay for itself in sowing one bushel of clover seed. It is a convenient, practical and durable machine. Sent anywhere on trial. Price, each, \$1.50.

Improved Leaming

A quick growing yellow variety, highly esteemed by those who have grown it. It usually produces two ears to the stalk. It is one of the seven varieties recognized by the Illinois Experiment Station, where it has been first in yield more times than any other variety. The Improved Leaming has been selected for a richer color—a beautiful brownish yellow—a deeper and somewhat rougher kernel. The ears average about 10 inches long and weigh ¾ to 1 lb. each. The stalks are of medium height with many broad leaves, making it one of the best sorts for ensilage and fodder. Numerous tests at the Experiment Station show it high in protein and oil content, making it valuable to the live stock grower and feeder. By mail postpaid, lb., 25c; 3 lbs., 60c. By freight or express, qt., 15c; pk., 75c; ½ bu., \$1.25; 1 bu., \$2.25; 2 bu., \$4.25; 5 bu., \$10.00. Sacked free.

This Special Mixture, as improved, will give a rare treat to lovers of true "Spencer" Sweet Peas. It contains some most superb seedlings that have been introduced. The flowers are of extremely large size, most beautifully frilled and waved on the standard, with well waved wings. While the plants are vigorous in growth and the gigantic flowers are borne most profusely on long strong stems, yet like all varieties of the true "Spencer" type they are extremely shy seeders and the seed can never be produced cheaply unless this superb new strain should be allowed to deteriorate. Per pkt., 10c; oz., 25c; 2 ozs., 40c; ¼ lb., 75c; per lb., \$2.50, postpaid.

The National Trio of Roses

THE RED, WHITE AND BLUE
RAMBLERS.

Scientific Hybridization has produced, through methods past the understanding of the average worker among flowers, a new rose which can easily be said to be the most novel creation of the century. No one pretends that it is the last word in Blue Roses, but it may be fairly described as an epoch-making variety for no variety approaches it! it is a new freak among Roses, and quite distinct.

The National Colors in Roses

THE POPULAR CRIMSON RAMBLER.

The plant is of a very vigorous growth, making shoots from eight to ten feet during the season. It is also magnificent in bush form; color is the brightest crimson. The flowers are produced in great pyramidal panicles, the individual flowers measuring about one to one and one-half inches in diameter. The foliage is a bright green and glossy, and contrasts finely with the bright crimson of the flowers. Price, 15c each; 4 for 50c; \$1.35 per dozen; large three-year-old plants, 25c each; \$2.00 per dozen; large three-year-old plants, field grown, with canes 3 to 5 feet, 50c each, by express only; 6 for \$2.50; \$4.50 per dozen.

THE BEAUTIFUL NEW WHITE RAMBLER.

Of German origin, and in habit of growth, foliage, manner of blooming, form of flowers and hardiness identical with Crimson Rambler. Flowers are pure snow-white and sweetly scented. Price, 15c each; 4 for 50c; \$1.35 per dozen, postpaid; strong two-year-old plants, 30c each; 3 for 85c; \$2.25 per dozen, postpaid.

THE BLUE RAMBLER, VEILCHENBLAU (Violet Blue)

The new rambler, "Veilchenblau," (Violet Blue), which is hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler. The blossoms, massed in large umbels, are semi-double, of medium size. The color, on first unfolding, is either reddish pink or purplish pink, then turns amethyst, and finally steel blue as the flower fades. The general color impression is that of the March violet. The yellow stamens appear in sharp contrast to the blue petals. Price, strong one-year plants, 15c each; stronger plants, 25c; two-year plants, 50c; extra large, 75c.

A NEW COMBINATION OF COLOR IN ROSES.

The introduction of Veilchenblau makes it possible to produce effect which have never before been possible. Combined with its parent, the popular Crimson Rambler, which we offer in strong 1-year plants at 15c each; its worthy companion, the White Rambler, strong 1-year plants at 15c; the Red, White and Blue Trio for 50c, postpaid (the Trio in two-year plants for \$1.25, postpaid), will produce an effect heretofore unattainable.

Trees can not thrive when infested with the different kinds of sucking, biting and chewing insects. They can not produce high grade fruit---nor much of any kind. Systematic spraying will not only increase the quantity of your fruit crop but will wonderfully improve the quality as well. Thousands of fruit growers owe their present success to a good spray pump---after they had practically given up the hope of ever getting a good crop again.

DIAMOND EDGE FOOD CUTTER

Cuts clean and turns easily. Get this point firmly fixed in your mind. There is a difference between the Diamond Edge Food Cutters and a grinder or chopper. Note the very short cylinder of the Diamond Edge Food Cutter. Note the six stationary shear ribs on the inside of this cylinder. Note the shear cutting worm that grasps the meat and cuts it into strips before it reaches the cutting plates proper. The Diamond Edge Food Cutter costs so little and does such excellent work, and saves so much, that you should buy one and use it. Made in three sizes.
